

Hotel – Hospital Summary

Ranking the biggest and most equipped private treatment center in Iran and the Middle East, Gandhi Hotel – Hospital was founded in 2008 by a panel of national and international experts with the goals of providing diagnostic and treatment services and attracting health tourists. It is worthy of mentioning that Gandhi Hotel – Hospital is operating based upon the state – of – the – art technologies in hotel management and health services. The Hotel – Hospital complex, with an area of over 32,000 meters in square, has multifarious departments in a 17 – story hospital and a 21 – story hotel. It has 100 inpatient beds, 40 beds for intensive care, 17 operating rooms and 100 residential suites to accommodate patients and their partners and families.

In the hotel – hospital, we offer first – class services and amenities to the patients because we believe that focusing on the treatment stages and alleviating the concerns of the patients are very important for a better and quicker recuperating.

Our Mission

- Providing health care services (diagnostic and treatment services based on national and international standards)
- Providing cutting – edge treatment services to patients, their partners and families; considering professional and ethical principles
- Conducting scientific studies and researches on health services
- Changing society's attitudes towards centers of health services

Our Vision

Providing a novel model of health services and tourism therapy in accordance with national and international standards.

Our Values

- Patient – centered
- Caring and helpful
- Professional and ethical commitment
- Human resources development
- Creativity and innovation
- Client – centered

Gandhi's unique services, One step closer to health

Gandhi Hotel – Hospital, using the help of the best and the most expert staff and utilizing the most state – of – the – art instruments. Provides a vast range of professional services to the clients. It has various ready – to – provide – service department including specialty and sub – specialty departments, paraclinics, polyclinics, surgery department, ICU and infertility department, just to mention a few. In the following section, the departments and the services they provide will be introduced.

1. Cardiovascular Department

- Cardiology
- Adults' heart surgery
- Pediatric heart surgery
- Angiography
- Angioplasty
- Primary PCI
- CCU

2. Neurology Department

- Neurology
- Neurosurgery
- Psychiatric

3. Gynecology and Obstetrics Department

- Gynecology
- Delivery
- Epidural labor
- Gynecology surgery
- Infertility

4. IVF Department

5. Pediatrics Department

- Pediatric surgery
- Internal pediatrics

6. Special Care Units

- ICU and ICU, OH
- CCU

7. Neonatal Intensive Care Unit (NICU)

8. Internal medicine Department

- Lung
- Glands
- Hematology – Oncology
- Rheumatology
- Nephrology

9. Otolaryngology Department

- Ear, nose and throat surgery
- Cosmetic and plastic surgery

10. Gastroenterology Department

- Gastroenterology surgery
- Adults gastroenterology
- Pediatric gastroenterology

11. Orthopedic Department

- Orthopedic surgery

12. Orology Department

- Orology surgery

13. Cell and gene therapy Department

14. Anesthesia Department

- General anesthesia
- Cardiac anesthesia

15. Surgery Department

- General surgery
- Vascular surgery
- Pediatric surgery
- Cardiovascular surgery

16. Skin, Hair and Beauty Clinic

- Laser therapy
- Hair implant

17. Ophthalmology

- Eye surgery

18. Dental Clinic

- Orthodontics
- Jaw and face surgery
- General dental and gum services

19. Wound Clinic

20. Preventive Medicine

21. Health Check – up Department

22. Daycare Department

23. IN – home Services

24. Conference Room

25. Emergency Department

26. Diagnostic Medicine and Laboratory Department

- Medical diagnoses
- Pathology
- Molecular biology
- Genetics

27. Nuclear Medicine Department

28. Chemotherapy and Radiotherapy Department

29. Medical Imaging Department

- Digital Radiology
- Fluoroscopy
- Sonography
- Mammography
- OPG
- Bone density
- CT scan and CT angiography
- MRI

30. Rehabilitation and Physiotherapy Department

31. Medical Equipment, Materials and Pharmaceutical Department

- Drug
- Cosmetics products

Gynecology and Obstetrics Department

Extensive expert services are provided in the department of gynecology including women infection (acute and chronic), female hormonal disorder (disorders of the skin and hair and irregular menstrual periods), the treatment of all types of diseases of the ovaries (cysts and tumors, both benign and malignant), surgical fibroid treatment of the womb, cervical ulcers, laparoscopy (diagnostic and therapeutic), breast exams and test for cancers. Other services such as treatment of the problems related to puberty, premarital counseling preconception counseling, prenatal care, marital problems' consultations, menopause care, mammography, sonography, bone mineral density and osteoporosis treatment are offered, too.

The division of obstetrics, which is located next to the pediatric division, has three inpatient beds, one delivery bard and all equipment for monitoring fetus and mothers' vital signs. The department is suitably designed for mothers to be taken care of when having baby (either natural delivery or cesarean). All the stages for natural birth are monitored regularly by adept and experienced obstetrics and dedicated nurses. Our aim is to provide a best place for delivery by making the process as easy and as stress – free as possible.

The gynecology section also has 12 beds and 4 VIP rooms, this section provides services to the babies and the mothers after the surgeries.

IVF Department

The department is supported by staff which include university professors from top medical science universities like Tehran, Tarbiat Modares and Shahid Beheshti. In addition to staff that are professional and experienced at infertility treatment, the division is equipped with the leading – edge instruments. Armed with newfangled medical equipment, the personnel offer professional services in five laboratories of diagnostic andrology, andrology therapy, bio freezing embryology and PGD. It should be mentioned that the department is among the most referred, From among the various therapeutic procedures taking place in the division, the following can be counted:

- Primary visit, gynecology visit, urology and andrology visit
- Visit and consultation by a psychiatrist
- Genetic visit and consultation
- Nutrition visit and consultation
- Abdominal visit and consultation
- IUI (intrauterine insemination if sperm)
- IVF (in vitro fertilization)
- ICSI (intra – cytoplasmic sperm injection)
- PGD (determining the health and sex)
- Advanced laparoscopy and resectoscopic hysteroscopy
- Egg, sperm and embryo freezing, as well as long – term maintenance bank

Pediatrics Department

The department has 13 beds, 3 VIP rooms and 2 isolated rooms. The unique feature of the department is its elegant design perfectly tailored for infants. The kind and altruistic behavior evinced by the nurses in all departments, especially this one, provides a very friendly and disease – proof type of atmosphere, the department is ready to provide services to infants with surgical or internal diagnoses. Gandhi Hotel – Hospital prides itself on having present two pediatric sub – special surgeons and urologists in the department. The department is ready to give diagnostic and therapeutic services in the following areas:

- Infectious diseases
- Kidney diseases
- Blood disorders
- Digestive diseases

- Immunology diseases
- Rheumatic diseases
- Metabolic disorders
- Orthopedic diseases
- Urological diseases
- Neonatal surgery

Special Care Department

This department is for the patients who need special care. In the department, patients are constantly under the surveillance of CCTV cameras and are regularly monitored by experienced nurses. The unit, being the first center with such a facility in Iran, is equipped with special surgery rooms and some other isolated chambers to quarantine infections. The special care department includes 2 sections:

- **Intensive Care Unit (ICU):** The section is located on the seventh floor of the apartment. It has 7 beds with one isolated room and one room for special operations and is centralized with ventilator, monitor, suction and oxygen.
- **Coronary Care Unit (CCU):** The section is located on the sixth floor of the complex. It has 8 beds, 2 isolated rooms and one room for special operations. In addition, it is equipped with a ventilator, ECG, DC Shock, ultrasound, echo VIVIC and portable Radiology. Furthermore, each bed is equipped with vital signs monitors, oxygen and suction devices and syringe pumps.

Neonatal Intensive Care Unit (NICU)

The section is located on the sixth floor of the complex. It has 8 beds, two isolated rooms and one room for special operations. In addition, it is equipped with a ventilator, ECG, DC Shock, ultrasound, echo VIVID and portable radiology. Furthermore, each bed is equipped with vital signs monitors, oxygen and suction devices and syringe pumps.

Cell and Gene Therapy Department

The universal approach in the international arena has been moving towards personalized medicine. In this regard, of the essence has become the construction of centers for producing somatic and stem cells and providing the related therapy services.

Cell and gene therapy department of Gandhi Hotel – Hospital is located on the east side of the ninth floor of the complex. Having provided the required infrastructures and having been established on the experience and expertise of the knowledgeable researchers, this section has managed to successfully provide a nexus between genetics lab accomplishments and clinical and therapeutic services, various physicians and researchers have gathered to extend and apply the newly – devolved methods to cure different diseases such as cancer, AIDS and other malignant diseases of that ilk.

To date, about twenty thousand types of genetic or genetically – influenced diseases have been known. The center, with fully experienced staff buttressed by state – of – the art cytogenetic and molecular genetics technologies, has been established to give services to the clients in assessing the genetic status in Pre – implantation Genetic Diagnosis (PGD), prenatal Diagnosis (PND), Postnatal Genetics and Adult Genetic in accordance with international standards and the highest quality imaginable.

Anesthesiology Department

Gandhi Hotel – Hospital’s department of anesthesiology consists of highly qualified professionals apprised of the up – to – the – moment science and achievements. The professional staff provide clinical services for all surgical procedures under anesthesia. They also supervise the patients with critical conditions and those which are in ICU section. The department provides services for the treatment of acute and chronic pain, cardiovascular surgery and ICU. It also provides services for postoperative care and all the necessary services in the areas of dentistry, imaging, endoscopy, etc. in a nutshell, the department provides all the necessary equipment for a safe and comfortable place for anesthesia under the supervision of the professional staff.

Given the fact that after recovery from anesthesia, patients need to be supervised for a while, the anesthesia specialists are more than eager to take care of the patients until full recovery is achieved.

Surgery Department

In the surgery department, the medical staff utilizes the most advanced medical facilities to conduct operations in accordance with the latest achievements and the highest standards in the world. The section includes a general operating room to perform orthopedic surgery, neurosurgery, angiography, Post Cath and other general surgery. The department has three fully-equipped operating rooms with microscopes, arthroscopy and laparoscopy. It is equipped with C-ARM device for portable imaging and lead line walls to prevent radiation leaks.

Apart from these, technical pediatric and cardiovascular operations are performed in accordance with the highest international standards. The presence of the most skillful and experienced surgeons in the department is another distinguishing feature of the department. Furthermore, head and neck, thyroid, breast, gastroenterology surgeries, anal surgeries such as hemorrhoids, fissure and fistula, cancer and advanced laparoscopic surgeries are performed in the department, too.

Skin, Hair and Beauty Clinic

Beauty clinic of Gandhi Hotel – Hospital is among one of the most advanced center in hair and skin operations. Skin, hair and beauty clinic is located on the eastern part of the hospital in polyclinic department. The clinic provides unique services such as:

- Focusing on hair transplantation with minimal damage to the hair bank area and minimal side effects during and after the surgery
- Hair transplant with 98% density for the first time in Iran
- Completely natural hairline with extremely thin and invisible holes
- Invisible scar line which will completely disappear after 6 months
- Laser hair removal, using ultramodern technology (i . e . Palomar Vectus – Candela Alexandrite)
- Rejuvenation laser, removing the scars and holes caused by acnes and removing striae using Palomar Icon
- Lipomotic liposuction – the most modern method of removing fat
- Hair removal in less than 4 session
- Growing eyebrows and eyelashes without losing the natural appearance
- Hair transplantation in areas with less hair density
- Beard to hair transplant
- Mesotherapy, filler and Botox and PRP therapy

Otolaryngology Department (ENT)

Gandhi Hotel – Hospital otolaryngology department, with the help of university professors and sub-speciality surgeons, is fully prepared to offer services for therapeutic procedures such as consultation, examination and surgeries including.

- Consultation and performing cosmetic surgeries on face, nose and neck
- Endoscopic sinus treatment
- Snoring and sleep disorders treatment
- Hearing and ear disorders treatment
- Respiratory disorders treatment
- Swallowing disorders treatment
- Treatment of tonsils and pharyngeal infections in children
- Treatment of voice disorders and laryngeal stroboscopy
- Middle ear endoscopy

Urology Department

Gandhi Hotel – Hospital urology department is located in polyclinic department. The division acts in accordance with the most recent medical achievements in urinary and kidney surgeries. It also operates under the supervision of the most expert and experienced medical university professors to provide a very unique set of services to clients including:

- Consultation and examination of the patients with kidney problems
- Male infertility treatment and consultation
- Male sexual dysfunction treatment and consultation
- Endoscopic treatment of kidney stones
- Laparoscopic treatment of urological diseases
- Malignant and nonmalignant tumor treatment related to urinary and sexual organs
- Kidney transplantation

Health Check-up Department

Gandhi Hotel – Hospital check – up department, with the help of the specialty and sub – specialty physicians and the most advanced medical instruments, provide expert clinical, diagnostic and laboratory services. If the clients have any disorder in their body system, they can refer to the center in the shortest possible time and at the least possible cost. They will be taken well care of by our dedicated professionals.

Check – up services are performed in different levels. In the primary level, basic examinations (basic cardiovascular examination, respiratory system examination and internist visit) will be carried out. In later stages more advanced check – ups are performed in the center.

Inpatient and Daycare Department

The inpatient department is a place patients will be taken for extra treatment and cares when surgeries and other operations are finished. Four stories from Gandhi Hotel – Hospital (stories No. 8, 9, 10 & 11) are allocated for this purpose. Every story contains eight double bedrooms with private VIP services which are aimed to provide the best facilities for patients and accommodate their partners and families.

The hospital's policy for all the personnel of the department falls in the line of evincing mutual respect to prevent the occurrence of any discomfort or trepidation for the patients, their partners or families. In addition, distinctive facilities such as LCD TV, wardrobe, refrigerator, phone, internet, adjustable air conditioning, bathroom, and folding couch are provide. A nurse or hostess is present in all rooms to give services such as providing drug and food to the patients.

Furthermore, in each section, resuscitation equipment, portable monitors and other medical equipment are exclusively provided. Another advantage that could be counted for this department is the use of PTS intelligent system for handing patient records and reducing the unnecessary walking and movements of the individuals as much as possible. Experienced university professors, dexterous physicians, surgeons and nurses with RN and MA degrees are more than ready to provide medical services to the clients.

Daycare division is prepared with the aim of reducing patients' wait times and increasing clients' satisfaction. It has three operating and recovery rooms and is ready to give services to outpatients who need not more than one day of hospitalization. Infants' dental surgeries which need to be performed under anesthesia are also carried out in this department. After anesthesia, patients will be monitored for a couple of hours before being discharged. If the need be (based on physicians' discretion or the preference of the patients), patients can be hospitalized.

In Home Services

Gandhi Hotel – Hospital center of “home services” aims to provide advanced and specialized medical cares in the patients' homes (which, needless to say is very easy and preferable for them). Home care professionals are ready to provide services by giving perfect medical services and therapeutic cares. Gandhi Hotel – Hospital provides a wide range of professional home care services, running the gamut from professional nursing to visiting available specialists 24/7 on call.

Conference Room

Gandhi Hotel – Hospital conference room, which is fully equipped with unique features and staffed by professional, provides the ideal setting for the meeting, seminars, festivals and workshops. The division is equipped with a good sound system, lighting devices, data projectors, virtual seminars and lectures facilities, multiple platforms for discussion or consultation. The division is spacious enough to welcome 120 guests.

Emergency Department

The emergency department, which plays a pivotal role in Gandhi Hotel – Hospital, was the first division to start working after the inauguration of the hospital. Distinctive features of the division include offering high – standard services, providing a comfortable and stress – free atmosphere and respecting **patients' rights** and their privacy, among other thing.

The department is responsible for the provision of medical and surgical care to patients arriving at the hospital in need of immediate care. Our staff will leave no stone unturned to provide a stress – free atmosphere. Other features of the department are as follows:

- Beds for adults and one for infants which are equipped with a monitor, with the capacity to transform into ICU and CCU emergency beds
- Separate triage rooms with amenities such as monitors, oxygen, suction, etc., and having a separate door for entering the resuscitation room
- Rehabilitation and trauma rooms, with all the equipment and devices, for resuscitating all patients in critical conditions (accident, poisoned and cardiac arrests).
- A distinct 24 – hour outpatient operation room specialized for this division
- An isolated room with sterile entrance and negative pressure ventilation with a completely isolated environment, designed based on international standards, to prevent the spread of certain diseases and infections in the hospital.
- The possibility of receiving all patients with chronic obstructive pulmonary or reciprocity problems.

- Constant presence of a psychiatrist for special patients
- Presence of an emergency medicine specialist
- Distinct injection room
- Casting and splinting rooms
- Being non – adjacent to the emergency entrance of the hospital, making it convenient to skip the crowds and traffic; and having a specialized entrance for emergency vehicles as well.
- Having a hostess present to go through the hospitalization processes if the need be.

Orthopedics Department

Orthopedics department of Gandhi Hotel – Hospital, with the help of the best instruments and the most adept and experienced surgeons and university professors, offers expert services in accordance with international standards. The division perform various surgeries on joints including knees, shoulders, elbows, pelvis, wrists, spinal cords, arthroplasty and trauma. In the department, after the surgery the patients are offered physiotherapy services for a quicker recovery. It is worthy of mentioning that after performing the surgery, patients can rest in the rehabilitation division of the hotel under the supervision of a surgeon.

Laboratory and Diagnostic Medicine Department

The department, like other department, has recruited medical university professors expert and experienced in clinical and anatomical pathology, laboratory sciences, clinical microbiology, clinical immunology, molecular biology and genetics. Furthermore, using the most advanced laboratory equipment, being supported by efficient human resources and utilizing an advanced accreditation system, the center is ready to provide excellent services to the clients. In addition, the clients can use their insurances to cover all their costs. Different sections include:

Technical Labs

- Central Lab
- Emergency lab (24 hours)

- Performing genetic and cytogenetic tests
- Performing qualitative and quantitative molecular tests (PCR, Real Time)
- Doing biopsy in your home by sampling experts
- Performing in – home health check – up tests
- Performing specific tests for diabetes, osteoporosis, prostate, allergies, hypertension, etc.

The quality management division of the lab is responsible for controlling and monitoring the quality of experiments, following a Quality plan and using various standard software, internal Quality Control (IQC) and External Quality Control (EQC), in all stages of experiments.

Nuclear Medicine Department

This department is located on the southern part of the hospital, lower second floor. The division, which is equipped with advanced Dual Head device, provide diagnostic and, in some special cases, therapeutic services. The special features of the department include:

- The machine of the division can provide scan with SPECT imaging technique
- Gated SPECT method can be adopted for heart scans
- The division provide the following technical services:
 - Myocardial perfusion scan (SPECT and gated SPECT) with exercise test or drug injection (dipyridamole or dobutamine)
 - Lung perfusion imaging for diagnosis of pulmonary embolism
 - Bone scan

- Thyroid scan
- Parathyroid scanning
- Sentinel node scan
- Liver and spleen scanning
- Tear ducts scanning
- Kidney scan (DTPA, DMSA, captopril scan)
- Scanning for checking and diagnosing lesions such as hemangiomas of the liver

Radiotrathy and Chemotherapy Department

As one of the very important division of the hospital, the Radiotrathy and chemotherapy department is fully equipped to offer services to patients with cancers or patient with benign tumors. The division is located on the west side of the third floor of the hospital. The radiotrathy department, having visited the patients suspected to have tumor or cancer disease, will adopt therapeutic measures for the clients who have failed to be given a clean bill of health in order to prevent further possible damages to the healthy tissues.

Using the most advanced and modern radiotherapy instruments such as linear accelerator, PCRT – 3D advanced treatment planning and molding systems, the radiology center provides best radiology services (e. g. 3D conformal radiotherapy and IMRT). In addition, in not – too – very - distant future, multileaf collimator will be ready to be used in the department, too. The center, with the help of distinguished radiotherapy and oncology experts and professional staff and the use of the most up to date and advanced instruments in radiology, is ready to provide services. Furthermore, all costs can be covered by the insurance companies the Hotel – Hospital has signed contract with.

Medical Imaging Department

Located on the lower first floor of the hospital, medical imaging department provides services germane to medical imaging. The department staffed with experienced radiologists and expert,

offers services to outpatients 24 hours a day, 7 days a week, Distinctive feature of the department include:

- The department has state – of – the – art medical imaging devices such as CT – scan, MRI, CT Angiography, digital mammography, bone densitometry, digital panorex, fluoroscopy, digital radiography and ultrasonography. The division is also equipped with a digital radiography (DDR) device, a portable (with the use of CR) device and two ultrasound machines which have the most prestigious brands in the world.
 - Meeting all the standards of the radiation protection
 - Giving feedback or responses in the shortest possible amount of time; providing images to the patients on a CD
 - Having easy access to the ambulance
 - Having a recovery room
 - Performing portable sonography conveniently (in beds)
 - Having PACS (Picture Archiving Communication Services) service
- The medical imaging department provides the following services:

- MRI
- Multi – slice CT
- Bone Marrow Density (BMD)
- Mammography
- Radiography of the jaws
- Plain and color radiography
- Routine and specialized sonographies are performed in the department which include Doppler, 3D, 4D, pregnancy and NT & NB pregnancy, trans – vaginal and trans – rectal, etc., by both men and women radiologists in all shift works.

Physiotherapy and Rehabilitation Department

The physiotherapy and rehabilitation department, with an area of about 200 square meters, is one of the most equipped centers in physiotherapy. The department, having adopted experienced team from among the university professors and being armed with the ultramodern technological equipment, provides inpatient and outpatient services to the clients in two shifts, morning and evening. It has seven rooms that are equipped with the most modern apparatus. Besides, mecanotherapy section is equipped with exercise therapy equipment. In the department, there is an exclusive section for exercise therapy and heart and lung rehabilitation. Physiotherapists are well – versed with the necessary skills to provide a variety of specialized techniques and manual therapy in neurology and orthopedic diseases, etc. The specialists' staff are under continuous education and training and use new technology and methods of treatment strategically. The professional staff pay particular attention to physiological and affective needs of the patients so that they feel totally satisfied.

Physiotherapy services are tailored to the patients in each of orthopedics, surgery, ICU or CCU departments. The services, which are provided constantly and daily, aim to prevent complications from surgery and hospitalization, prevent motion limitation and improve range of motion of joints, etc.

Other activities taking place in this department include training courses for patients with back, neck and knee pain, exercise during pregnancy (before and after childbirth) and exercises to relieve urinary incontinence, etc. In this regard, several courses and seminars with national and international leading experts are held.

Medical Equipment, Materials and Pharmaceutical Department

Gandhi Hotel – Hospital pharmacy is located in the eastern side of the entrance area. It has both internal and external success points and includes outpatient pharmacy, hospitalization pharmacy and a warehouse.

The services offered by the pharmacy include:

- Drug preparation and delivery to outpatients, inpatient wards and operating rooms
- Giving consultation and drug information
- Giving signal prescription and combined drugs
- Presentation of the selected national and international orthopedic and cosmetic brands
- Preparation of all drugs and consumables materials required for patients during hospitalization
- providing technical information about IVF (infertility) drugs and distributing them

Technological Medicine

Science and Innovation, for the provision of well – being

Needless to say, various factors are influential for quick recovery of the patients. That being said, next to the physician's dexterity and experience, medical equipment are deemed the second most important factor for precise diagnoses and also for better surgical operations. Gandhi Hotel – Hospital is equipped with up – to the – moment instruments and devices to provide such services.

In the Gandhi Hotel – Hospital, the medical technologies and a friendly – hotel – like treatment of the patients, provide a serene and stress – free atmosphere.

For example, Artis zee Angiography sampling device, Zeiss Opmi Vario psychiatric microscope and prima SP2 anesthetic machine, just to mention a few.

Tourism and Treatment, a new experience of healthiness

International Patients Department (IPD)

Health Tourism in Iran

Tourism therapy or medical tourism is a travel from one country to another to obtain medical treatment. One reason for such travelling is the lack of similar treatment in their own countries. In addition, sometimes patients prefer medical tourism because the costs of the services could be considerably less than those of their own countries. According to the latest statistics, Iran is home to 3 to 4 million international patients annually.

Iran, due to recent developments in health and medical tourism, is considered one of the best places for tourism therapy. Travel to Iran could be an unforgettable and special experience for you. This is so because besides medical treatment purposes, you can visit one of the most important monumental sites in history. Furthermore, you can see the pristine nature in Iran and also get to know Iranian culture and customs.

When you get Treatment visa you can feel sure that the International Patients Department will take you care even after you discharge from hospital.

International Patients Reception

In Gandhi Hotel – Hospital, a special place has been allowed to meet the needs and expectations of the international patients. All the services, running the gamut from reception to discharge, are provided exclusively in the division. The professional staff of the international patients division are also ready to provide all types of services. For the sake of convenience, if clients need any information or consultation, they can get information through phone, internet or in person.

Residency Services

Gandhi Hotel – Hospital, being a unique and special services provider in the country, offers various services to the patients and their families and partners. The 10 – story – department has 90 suites. Each suite, in addition to various welfare services, has advanced medical equipment. In the division, the caring and professional nurses join forces with the hostesses to provide best services for the clients.

Travel Plan

The international patients department of the Gandhi Hotel – Hospital plans clients' travel with regard to their preferences. The plan is perfectly designed based on the patients' time limitations and their medical needs. The plan is designed in a way that the services will be provided in the shortest amount of time and with the highest quality.

Travel Services
